Remote Education Information for Parents / Carers

The purpose of this document is to share information regarding what to expect from Cranford CE Primary School in terms of Remote Education during periods of school closure or pupil isolation relating to coronavirus (COVID-19).

What Is Remote Education?

Remote education, sometimes referred to as remote teaching and learning is, broadly speaking, any teaching and learning that happens outside the classroom, with the teacher not present in the same location as the children. This can encompass online learning, delivered through digital technologies or learning that involves workbooks and other paper based resources.

Some remote education can be delivered live. Other remote education can be prepared by teachers beforehand (e.g. recorded sessions or provision of other materials) and then can be accessed by the children at a later date.

Remote teaching can be delivered by the children's class teachers or by other teachers / personnel nationally.

Accessing Remote Education

How will my child access online remote education that you are providing?

We use the online tool, Zoom, enabling access to our live provision ("Live Learning"). Zoom invites/links for lessons are emailed to parents weekly. We use Zoom links for:

- Welcoming children to the school day each morning
- Live teaching sessions across the curriculum with the exception of PE and certain Music lessons
- Class / group feedback sessions
- Collective worship
- Class reading time (shared reading)
- Pupil welfare calls

Additionally, we use the Purple Mash platform which is a single point of access for all of our remote education resources, whilst our youngest pupils and their families continue to use Tapestry as a way of sharing resources and work from home. This means that all resources that need to be accessed by pupils can be found in one place. Such resources include the learning resources that are needed for each lesson (e.g. web links or posted resources).

During the zoom sessions, teachers provide live, 'in the moment' feedback. Additionally, pupils are required to send scanned copies of specific pieces of work to their teachers via the individual class email address.

We encourage all our children to access this platform using a laptop if at all possible. Evidence suggests that children tend to spend longer accessing a remote lesson when they are using a laptop rather than when using a tablet or a phone.

If my child does not have digital or online access at home, how will you support them to access remote education?

We recognise that some children may not have suitable online access at home. We have asked all parents to let us know if this is the case so that we can help.

We have taken the following approaches to support children to access remote education:

Devices:

- We have been able to reassign some school laptops for pupil use at home with an accompanying loan agreement.
- We have been able to access an allocated number of devices from the government's 'Get Help with Technology' scheme.

Internet Access:

- We have been able to access free mobile data increases for some children on the following networks:
 - Vodafone.

This allows other devices to connect to the internet via a mobile phone.

If your children are still unable to access online, please contact the school office as soon as possible, if you have not done so already.

If children are unable to access online learning despite the measures taken above, we have put in place a system for collating and distributing paper packs of remote learning which match, where possible, the curriculum that is being delivered online and in the classroom.

We:

- Provide paper copies of any teacher devised resources.
- Provide published workbooks aligned to our Maths and English curriculum e.g. White Rose workbooks, CGP workbooks.

We have also provided exercise books for all children to work in and writing tools where necessary e.g. pens, pencils, rulers.

In addition to the work they may see during each live 'zoom' session (on whiteboards, using manipulatives, etc), class teachers will also ask to be sent (as a minimum) one piece of work per subject, per week for all curriculum lessons. To facilitate this, parents are asked to take photographs of their child's work - as recorded in books at home - using their mobile phones (as guided in published documentation). Photographs then need to be sent to the Class Teacher via the individual class email addresses.

The Remote Curriculum: What Is Taught To Children At Home

Will my child be taught broadly the same curriculum as they would if they were in school?

The answer to this question is 'yes'. The aim of any education is to deliver a high-quality curriculum so that children know more and remember more. Remote education is just another way of delivering our curriculum. We deliver the same curriculum remotely as we do in school, wherever possible and appropriate. Just like the classroom curriculum, it is carefully sequenced and ensures that children obtain the building blocks they need to move on to the next step.

Where we have taken the decision to use online resources, we have selected these carefully and have taken the time to match these resources to our long term curriculum plans for individual subjects. We have then matched online sessions within each sequence of work to those that are taught in the classroom.

The vast majority of our curriculum is delivered 'live' by our teachers. Hence, the same classroom curriculum is accessed by all children.

However, we have needed to make some adaptations to some subjects, such as PE and Music. Replicating on site PE lessons is not easy remotely. We suggest alternative online resources so that your child still has regular physical exercise throughout each week. The same is true for music, where parents may not have access to percussion instruments, for example.

Remote Education Time Each Day

How long can I expect work set by the school to take my child each day?

The government expects schools to provide the following amount of remote education (including remote teaching and independent work):

Reception (EYFS)	Less than 3 hours a day
Years 1 and 2 (Key Stage 1)	3 hours a day as a minimum
Years 3-6 (Key Stage 2)	4 hours a day as a minimum

However, we view the above as an absolute minimum and aim to provide remote education that reflects that of a normal school day. English, Reading, (Phonics depending on the age of your child) and Maths are provided daily, as they are on-site.

We issue weekly / daily timetables that reflect a normal school day. We treat "Live Learning" as close to a 'normal' school day as possible and expect children to engage with the full offer as they would were they on-site. We do recognise that on rare occasions, this will not always be practical. However, we provide a timetable so that a routine can be established; a routine can prove beneficial to children and support them in the management of their school work.

How will my child be taught remotely?

We ensure that our remote education includes the important, key principles of effective teaching. We provide children with an overview of the bigger picture and where a specific lesson or activity sits within a sequence of lessons.

Whether we deliver live lessons, recorded sessions provided by our staff or select nationally available, quality recorded sessions, we ensure that the remote teaching includes the following:

- Clear explanations
- Teacher modelling and scaffolding of new knowledge
- 'Chunking' learning in to small parts (it is often harder for children to concentrate when being taught remotely)
- Opportunities for children to practice
- Opportunities for children to apply their new knowledge
- Assessment of children's learning taking place and future adjustment of teaching accordingly
- Feedback to children on how to progress.

We do not expect our children to discover new content for themselves through long term projects and long term internet research.

We also make sure that our remote education is interactive where possible so that children can ask questions about their work (please see the engagement and feedback section below).

We have clear and high expectations of children when accessing remote education and we communicate these to the children at all times.

We use a combination of the following approaches to teach children remotely:

- Live teaching (online lessons) across the majority of the curriculum (as detailed above). We have made contact with parents with several siblings in our school to make arrangements for them all to access these live lessons.
- Online resources from available websites supporting the teaching of specific subjects, including video clips (e.g. BBC Bitesize, Oak National Academy) for Music and PE.
- Teacher devised resources posted online.
- Reading books provided by school.

Please note:

A pupil's first day of being educated remotely might look slightly different from that outlined above while we take all necessary actions to prepare for a longer period of remote education. We will need a little time to post online the remote learning tasks that have been matched to the classroom curriculum and provide the timetable for the rest of the week. We will, however, on the first day of remote education, send home some learning tasks that can be completed.

Engagement and Feedback

What are your expectations for my child's engagement and the support that we as parents and carers should provide at home?

We expect children to access the full daily timetable where at all possible and engage in all remote education provided, in the same way as they would engage in school. However, it is more difficult to engage and motivate children remotely than when they are in the classroom. There are more distractions and we, as teachers, are not physically present.

We have taken time to try to make our remote education engaging for all children. For example, we try to make sure different types of tasks and activities are alternated. We also aim to make our remote education as interactive as possible, including enabling peer interactions each day.

Engagement increases when children feel part of the school. Whole-school collective worship is therefore provided in addition to class welcome time first thing in the morning, whole class reading sessions and group feedback sessions. We want our children to continue to feel part of the school community even when learning remotely.

Without putting an unreasonable burden on parents, we ask that parents help support their child's learning by:

- Ensuring that their child can access the remote education provided
- Providing a quiet space to work if possible.
- Setting routines e.g. having breakfast and lunch at a set time.
- Helping children with the technological aspects of online learning.
- Offering help with specific learning tasks if possible.

We also ask that parents follow the guidance outlined in the Remote Meetings and Live Teaching document that has been circulated to parents for live teaching sessions and that parents have shared the relevant expectations outlined in the document with their child.

Where Catch Up tutoring sessions are also accessed from home, we ask that parents follow the home tutoring agreement.

How will you check whether my child is engaging with their work and how will I be informed if there are concerns?

In order to ensure we know that children are engaging with remote education, we complete a register of children who are accessing live sessions. We also keep a record of work submitted so that we know if your child is completing any independent work as part of, or following, live lessons.

It is our expectation that all children should engage with remote education. If a child is not, we will contact the parent by phone and discuss how we can address any barriers that are hindering engagement.

How will you assess my child's work and progress?

Feedback and assessment are still as important in remote education as in the classroom. As teachers, we assess children's work and progress continually, through their contributions in lessons, through talking with children and through the work that they produce. Such assessment continues in remote education. However, it can be more difficult to give immediate feedback to children remotely than in the classroom.

We have adopted the following approach to ensure giving feedback still happens effectively:

- In live sessions children can contribute in a number of ways e.g. verbally answering teacher questions. Immediate feedback can then be given individually and to the whole class as judged necessary.
- In lesson, whole class / group feedback sessions. These enable children to talk through their learning and for teachers to address any questions, misconceptions and feedback on the work the children have produced.
- Small group and individual sessions (called interventions) have been set up to ensure those children who need extra work on specific areas are able to access this.

As you can see from the above, feedback to children about their learning can take many forms and may not always mean extensive written comments for individual children. Frequent contact between children and teachers is crucial.

Additional Support For Children With Particular Needs

How will you work with me to help my child who needs additional support from adults at home to access remote education?

Children with special educational needs and disabilities (SEND)

We recognise that some children with SEND may not be able to access remote education without support from adults at home. We acknowledge the difficulties this may place on families, and we work with parents to support these children.

We:

- Adapt learning tasks provided, as appropriate.
- Provide individual / small group live sessions to focus on specific targets.
- Speak with parents to discuss how remote education is working from their perspective.
- Ensure pastoral calls are carried out with the child (and the parent as appropriate).

The very youngest children

It is recognised that the very youngest children learn through play and that they should not be sitting in front of a screen for long periods of time. Therefore, we adopt a different approach to remote education for our very youngest children.

We:

- Provide live teaching sessions each day, focussing on Literacy and early Maths, and specific phonic sessions. These are delivered in small groups, replicating 'normal' practice.
- Prioritise early reading in the learning activities provided and ask parents to prioritise these.
- EYFS pupils are invited to join in with afternoon sessions but there are also suggested learning activities that can take place through play.

Remote Education For Self-Isolating Children (When Their Bubble Is Not Self-Isolating Or Not During A National / Local Lockdown)

Where individual children need to self-isolate but the majority of their peer group remains in school, the remote education will differ slightly from the approach for whole groups, due to the challenges of teaching children both at home and in school. Please be reassured that we put in place remote education for any self-isolating child to access a planned and well sequenced curriculum with meaningful, learning tasks.

In this instance we aim for your child to access live teaching throughout the school day through the online tool, Zoom.

Where a child cannot access live teaching, learning tasks will be sent home that have been matched to the curriculum delivered in the classroom, similar to the approach outlined above.
